

VoIPTelCaster VTC 100

Green series PBX

A phone system designed for small and medium businesses, the VoIPTelCaster PBX offers powerful capabilities to help employees communicate more effectively with customers, vendors, and each other. Combining advanced, big business functionality with the ease of use and simplified management that Small and medium sized businesses require.

VoIPTelCaster helps small and medium businesses use communications to differentiate them from their competition.

The VTC 100 runs with only 60 watts of power versus the 300 to 450 running on our older model and many other PBX systems will run at 480 watts.
